This action is responsive to applicant's amendment/remarks filed 12/26/07. Claims 1-9 are currently pending.

The previous 112 rejection and claim objection(s) are withdrawn in view of applicant's amendments.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as obvious over Matsuba et al WO 02/035554.

Note that U.S. 2004/0004209 is relied upon as the English language equivalent of WO '554.

This rejection is maintained for the reasons set forth at pages 4-5 of the Rejection mailed 09/25/07.

Applicant's remarks regarding this rejection are noted.

Initially, note that the rejection has been maintained under 103 only (102 rejection is withdrawn).

It is noted that applicant has amended the claims to require "the organic vehicle contains a cellulose resin or an acrylic resin". Applicant's discussion of such in the response is noted. However, the examiner submits that a careful reading of Matsuba teaches the organic vehicle resin may be acrylic (para 0074, Col 10). Such meets the newly added claim limitation(s).

With respect to the instantly recited ratio of glass frit, the examiner respectfully submits that the skilled artisan would have to utilize only routine testing in order to arrive at the claimed range. Note that Matsuba teaches the addition of glass frit for improving adhesion of the composition to a substrate (para 0074). "[W]here the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation." In re Aller, 220 F.2d 454, 456, 105 USPQ 233, 235 (CCPA 1955). In re Hoeschele, 406 F.2d 1403, 160 USPQ 809 (CCPA 1969) (Claimed elastomeric polyurethanes which fell within the broad scope of the references were held to be unpatentable thereover because, among other reasons, there was no evidence of the criticality of the claimed ranges of molecular weight or molar proportions.).

In view of the foregoing, the above claims have failed to patentably distinguish over the applied art.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened

statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
